NYX 4MP Licence Plate IP Camera

AUTOFOCUS

ONVIF

Features

Capturing licence plates clearly at night whilst the vehicle is in motion is not possible with standard cameras. In low light conditions, cameras naturally enter a long exposure mode which results in motion blur and blooming. The NYX LPR cameras are specially engineered to combat these problems, giving clear licence plate images at night where others can't.

Built-in Intelligence Analytics allow for fast event searching and playback when used with any NYX network video recorder.
