REMOTE VIEWING WITH YOUR SMARTPHONE

You can remotely view your CCTV system by installing the remote app that is available from iTunes and Google Play stores

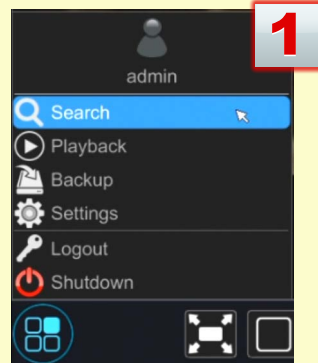

SuperLive Plus requires you to scan a QR code that is found in the information screen of your recorder.

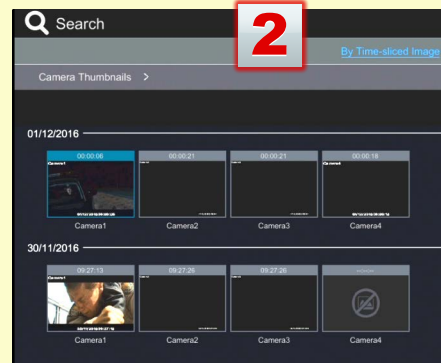

Scan the QR code with the app.

(See app instructions for more details).

TIMESLICE SEARCH

To find and play video footage, click on the  icon and select Search.

From the Search page, find the day you want to review and then double-click on the camera of interest.

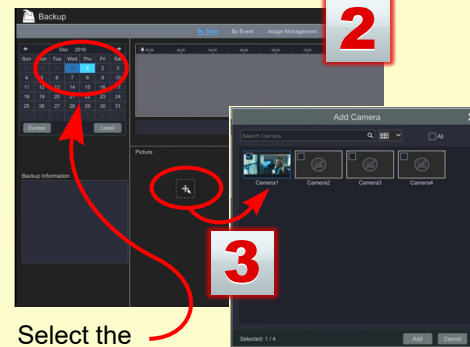

Now you will see a thumbnail for every hour of the chosen day. Double click on an hour, and the page will show a thumbnail for every minute. Double-click on a minute thumbnail to start playing back the video.

BACKUP

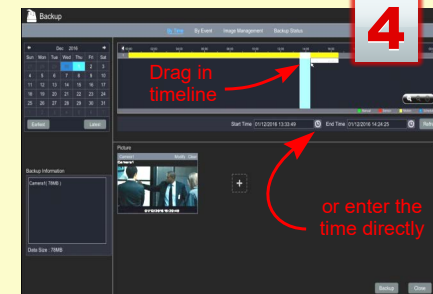

To backup video, click on the  icon and select Backup.

Select the desired month and day from the calendar.

Add the desired cameras by clicking on the  and then clicking on each camera thumbnail.

You can drag across the timeline to set the backup period, or you can enter the start and end time directly in the time settings. Insert a USB flash drive and click on Backup.

With the USB flashdrive selected, click on Backup to complete.
